Subject: Library Board Orientation Kit - Resource

A message of interest to Library Chairs, Liaisons and Directors

The Trustee Orientation Kit began in 1991 as a publication for library trustees, written by staff from the Southern Ontario Library Service, with assistance from OLS-N and the Ontario Library Boards Association. In 2004, the name was changed to Library Board Orientation Kit to focus attention on the board as the legal entity, rather than on the individual trustee. In 2010, the name of the publication has been changed again, this time to Library Board Development Kit, to reflect a new focus on board development as opposed to only board orientation, but you will find that the material and style of presentation is very similar to previous Kits. You are welcome to use the material online or to download and print for your individual board members.
